

Workshops 16 April

ROOM	KUJAWSKA	POMORSKA	KATARZYŃKA	WIŚŁA (2nd floor)	KOPERNIK (2nd floor)				
	<i>AG Learning</i>	<i>Self-domestication and language evolution</i>	<i>Modality Matters</i>	<i>Compositionality</i>	<i>Word order evolution</i>				
9:00	Welcome	Welcome	Introduction	Introduction & Welcome	Opening				
9:10	Gervain: “The frequency-based bootstrapping of basic word order in infants and rats”	Kluender: “Be kind to animals – they may have something to tell us: Consequences of domestication and ritualization”		Perlman, Little & Thompson: “Iconicity in signed and spoken lexicons: implications for language evolution”	Sandler: “Compositionality and the Grammar of the Body”	Culbertson: “A cross-linguistic investigation of the cognitive biases underlying noun phrase word order”			
9:20									
9:35	Wilson: “Behavioural and neuroimaging insights into structured sequence learning in humans and nonhuman primates”	Boeckx: “Testing the Self-Domestication hypothesis experimentally”	Silva et al.: “Modality-specific effects on language emergence - and why looking at interaction also matters”	Schouwstra: “Building Meanings: Compositionality of Human Language, and its Evolution”	Jing, Blasi & Bickel: “Harmony and dendrophilia in syntax”				
9:40									
9:50									
10:00									
10:10	Spierings: “Artificial grammar learning in birds”	Clay: “Bonobos and the self-domestication hypothesis: Insights from vocal communication and its implications for language evolution”	Scott-Phillips et al.: “Intercultural contact and representational form”	Kita: “Young Children Make their Gestural Communication more Compositional: Evidence from Nicaraguan Sign Language and Silent Gestures by Hearing Children”	Vos, Schouwstra & Kirby: “Word order, naturalness and conventionalisation: evidence from silent gesture”				
10:20									
10:25									
10:30									
10:40	Martins: “Recursive Hierarchical Embedding in the Visual, Musical and Motor Domains”	Clay: “Bonobos and the self-domestication hypothesis: Insights from vocal communication and its implications for language evolution”	Scott-Phillips et al.: “Intercultural contact and representational form”	Kita: “Young Children Make their Gestural Communication more Compositional: Evidence from Nicaraguan Sign Language and Silent Gestures by Hearing Children”	Ergin et al.: “The emergence of argument structure in Central Taurus sign language”				
10:50									
11:00	Miralles & Toro: “Rats and Humans on regularity detection: generalization from a go no-go paradigm”					Clay: “Bonobos and the self-domestication hypothesis: Insights from vocal communication and its implications for language evolution”	Scott-Phillips et al.: “Intercultural contact and representational form”	Kita: “Young Children Make their Gestural Communication more Compositional: Evidence from Nicaraguan Sign Language and Silent Gestures by Hearing Children”	Ergin et al.: “The emergence of argument structure in Central Taurus sign language”
11:05									
11:10	Coffee break	Coffee break	Coffee Break	Sandler: “Irit Meir † and her Legacy: A Tribute” <i>In room WIŚŁA, in front of WIŚŁA (2nd floor)</i>					
11:25	Turn the page ↷				Turn the page ↷				

ROOM	KUJAWSKA	POMORSKA	KATARZYNKA	WISŁA (2nd floor)	KOPERNIK (2nd floor)
	<i>AG Learning</i>	<i>Self-domestication and language evolution</i>	<i>Modality Matters</i>	<i>Compositionality</i>	<i>Word order evolution</i>
11:20	Endress: “The idiosyncrasy of learning constraints”	Coffee Break	Towns & Schouwstra: “Interpreting patient animacy in silent gesture”	Mesh, Stamp & Dachkovsky: “Pointing Toward Grammaticalization: Conventionalization of Pointing in Emerging Sign Languages”	Sinnemäki: “Typological patterns of word order and argument marking: What can their correlation in creoles, pidgins and regular languages tell about language evolution?”
11:25	Westphal-Fitch: “Performance on a visual Artificial Grammar Learning task in hearing and deaf participants”	Fröhlich: “Different ‘communication styles’ in bonobos and chimpanzees? Insights from mother-infant interactions in the wild”			
11:45			Mudd, Kirby & Schowstra: “Improvised word order biases are not modality specific: evidence from non-linguistic vocalizations”	Quick Break	
11:50		Jaeger: “A Bayesian test of the lineage-specificity of word order correlations”			
12:00			Okanoaya: “Domestication syndrome in Bengalese finches”	Zuberbühler: “Combinatorial Capacities in Primates”	
12:05	Ortega & Ozyurek: “Systematic alignment between different types of iconicity and semantic domains in silent gesture: raw materials of sign language emergence”	Fenk-Oczlon: “A cognitive and systemic typological account of word order”			
12:10			Theofanopoulou: “Convergences in (self-)domesticated species”	Mini Discussion	Gómez-Rodríguez: “Syntactic parsing of human language by minds and machines: Some interesting parallels”
12:20	Versace: “Artificial grammars in visual modality: A comparative perspective”	Discussion			
12:30			Ravnani: “Evolving building blocks of rhythm: How human cognition creates music via cultural transmission”	Discussion	
12:35	Discussion				
12:40		Discussion			
12:45	Discussion				
12:50		Discussion			
13:00	Discussion				
13:20		Discussion			
13:25	Discussion				
13:30		Discussion			
13:45	Discussion
